### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 2, 5, 7-11, 14 and 16-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Turner et al. (6794272).

Turner (Figures 1-8) shows an integrated circuit having a transistor 37 located on a substrate 32, an interlevel dielectric layer 34 and a contact free of seams or voids for use in the integrated circuit. The integrated circuit has a via located in the substrate 32 and a contact plug having a first portion 36 made of tungsten with a notch which is filled with a second portion 38 which may be also made of tungsten. An adhesion layer of titanium is deposited over first portion 36. Turner further teaches a method of making the contact including the steps of forming a via and etching a notch and placing the contact plug. The transistor could be a CMOS, BiCMOS or bipolar device.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3, 4, 6, 12, 13, 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Turner et al. (6794272).

Turner shows all the features of these claims except the depth and the size of the notch and an adhesion layer. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to provide a specific depth and the size of the notch and an adhesion layer because a change in size is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955).

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sandhu et al. (5844318) and Heerman (6781215).
